THE HUMAN FACTOR

AI Content Reviewer

Volunteer role / Remote / Flexible participation

Help make hearing-health information more accurate, understandable, and useful. Hearing Is pairs technology-assisted content creation with thoughtful human review. Volunteer reviewers help identify factual issues, unclear language, and places where important context may be missing.

ROLE AT A GLANCE

Review assigned draft content and offer constructive, source-based comments. No required weekly hours, publication approvals, or clinical credentials. Assignments may be accepted or declined as availability allows.

WHAT YOU WILL DO

- Read articles, news summaries, and educational drafts for accuracy, clarity, and relevance.
- Check claims against linked research, reputable reporting, government guidance, and other credible online sources.
- Flag factual errors, missing attribution, outdated information, misleading headlines, or unsupported conclusions.
- Notice when drafts confuse early findings with established evidence, animal studies with human research, or manufacturer claims with independent evidence.
- Recommend clearer language and practical context for patients and everyday readers.
- Send concise comments, suggested corrections, and source links. Flag uncertainty instead of guessing.

WHAT WE ARE LOOKING FOR

- Comfort reading online articles and explaining the main point in plain language.
- Ability to use everyday web search, follow links, and compare sources and publication dates.
- Attention to detail, sound reading comprehension, and respectful written feedback.
- Interest in hearing health or accessibility is welcome, but not required.

No degree, professional license, previous editing job, or technical AI experience is required.

REVIEW, PARTICIPATION & AGREEMENT

A role built on trust.

Choose a draft when available, check it against credible sources, and share concise comments. Hearing Is retains editorial control, including expert escalation, publication, and corrections. Reviewers do not diagnose, advise patients, guarantee accuracy, or approve final content. Flag medical uncertainty for qualified review; never share patient-identifying information.

VOLUNTEER ACKNOWLEDGEMENTS

Please check each box to indicate your agreement. The agreement is effective only when the reviewer has completed the identifying fields below.

☐ **Unpaid and voluntary participation**

I understand this is an unpaid volunteer opportunity. No salary, fees, benefits, or future paid position are promised. I participate freely and may decline assignments or stop volunteering at any time, subject to applicable law.

☐ **Editorial discretion and no publication duty**

I understand Hearing Is is not required to use my feedback. I have no minimum assignment or output obligation and do not approve final publications. My comments do not create a duty to readers or make me responsible for final editorial decisions, except as the law otherwise requires.

☐ **Draft privacy and use of feedback**

I will not share nonpublic drafts or internal review materials without permission. I authorize Hearing Is to review, edit, adapt, and incorporate my voluntarily submitted feedback without payment or attribution.

☐ **Ordinary-risk acknowledgement and limited release**

I participate remotely at my own discretion. To the extent allowed by law, I assume ordinary risks of participation and release Hearing Is and its representatives from claims arising from ordinary negligence related to this role. This does not waive claims for gross negligence, recklessness, intentional misconduct, or rights that cannot legally be waived.
